NO SURPRISE! MICROSOFT IS GUILTY OF MAINTAINING A MONOPOLY- BUT SUFFERS NO PENALTY!

NO JUSTICE TODAY! This company profits illegally from it's thoughtful actions, robs the world of great competitive ideas by it's business practices, and is found guilty in court and is extended NO REAL PUNITIVE ACTION> NOT SMART.

Our only hope now is that Linus Trippolli develops a new secret operating system that costs \$40-50 US that runs all middleware and user programs on every system and completely disregards who the manufacturer of that software is. But in the mean time MS is busy trying to get new proprietary 'standards' adopted by anyone stupid enough to accept the norm.

YOU GET AN F. Hope the DOJ doesn't get the chance to prosecute the terrorists or we all will be in for it. My vote is Military Tribunal after this.
